

PIER MONACO

Milkcan
designed | engineered

The Monaco creates a new benchmark in letterbox design and engineering.

Constructed using FibreBond™ technology, it retains the quality look and feel of standard concrete but is light enough to easily transport.

It also features a paintable, durable render-style finish, a 304 grade stainless steel front fascia with a rain-proof flap and a galvanized steel letterbox with Interpon powder coat finish to keep mail clean and dry.

Key lock + 4 keys

Takes A4 mail

Theft and rain resistant
