

# AUSTIN PARCEL LETTERBOX

## Installation Instruction Sheet

Congratulations on purchasing the Austin parcel letterbox. We have designed the Austin to offer a stylish, efficient and convenient way to have parcels delivered securely to your home. It also receives large A4 envelopes and offers excellent security for your mail and parcels. The rear door with keylock offers an easy and convenient means of retrieving your mail and parcels.

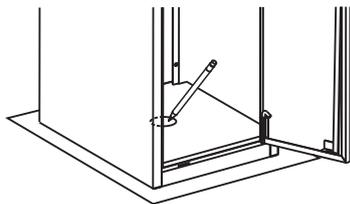

## Installation

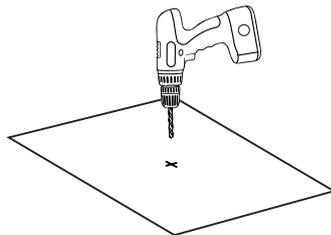

The Austin parcel letterbox receives parcels and general mail. You will need to mount it in a location that is easily accessible to Australia Post and couriers. This will typically be at your front boundary.

### Mounting onto an existing concrete floor

1. Place your letterbox in the chosen location and mark the mounting hole with a pencil

2. Drill a hole (10mm diameter x 60mm deep) into the concrete floor for the mounting bolt

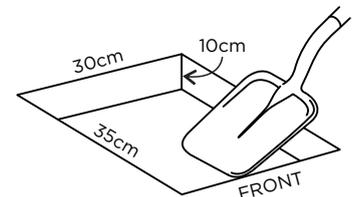

3. Bolt the letterbox to the concrete floor with the mounting bolt provided.

### Mounting onto ground

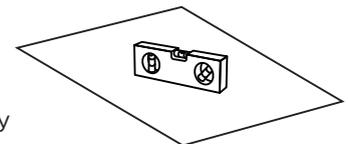

You will need to install a small concrete slab that is suitable for your parcel letterbox to be bolted onto.

1. Dig a hole approximately 30cm x 35cm x 10cm deep

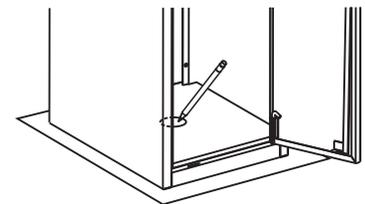

2. Fill hole with concrete

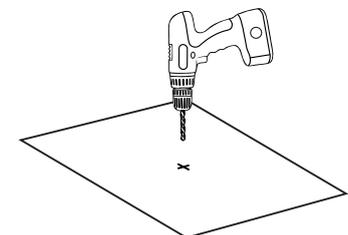

3. Use a spirit level to level the concrete and then leave it to fully dry

4. Place your letterbox onto the concrete slab and mark the mounting hole with a pencil

5. Drill a hole (10mm diameter x 60mm deep) into the concrete slab for the mounting bolt

6. Bolt the letterbox to the concrete slab with the mounting bolt provided.

## Using your Parcel Letterbox

Parcels up to 15 x 23 x 26cm can be delivered via the parcel chute. The courier simply pulls the door down, places the parcel inside and closes the door. The parcel will fall into the retrieval area at the bottom. A specially designed internal flap stops anyone from reaching into the retrieval area when the chute is opened.
