

MILANO LETTERBOX

Congratulations on purchasing the Milano letterbox. We have designed this letterbox to offer a practical way to have mail delivered securely to your home.

You will need to install the Milano letterbox in a location that is easily accessible to Australia Post and couriers. This will typically be at your front boundary.

The ideal height for the mail opening is 90 - 120cm from the ground.

Installing into a brick wall

1. Build the brickwork up to the desired height and set the sleeve in place following these guidelines;
 - Expand the sleeve to match the depth of your wall or pier
 - For plain brick walls, the front and back should sit flush with the wall
 - For rendered walls, set the front and back slightly forward so that they will sit flush with the finished render surface.
2. Complete the remaining brickwork around the letterbox.
3. Finish any brick cleaning or rendering.
