

# Vinyl Decal House Number

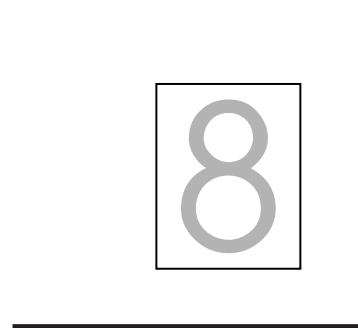

The vinyl decal consists of a top sheet, the decal and a backing sheet

①

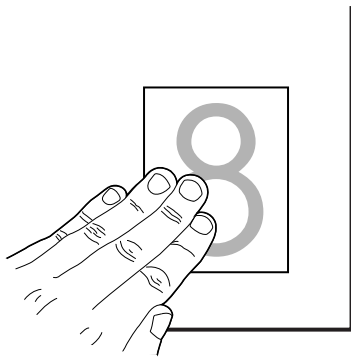

Slowly peel off the top sheet. Ensure the decal stays attached to this top sheet as you peel it off the backing sheet.

②

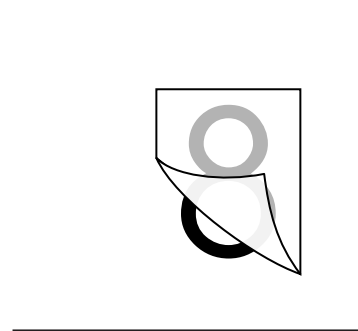

Carefully align the decal (still attached to the top sheet) over the surface you are going to apply it to.

③

Press the decal (still attached to the top sheet) onto the surface and firmly rub the top sheet to ensure the decal sticks well to the surface.

④

Starting from one corner, slowly roll the top sheet back on itself so that it peels away from the decal

If the decal starts to come away with the top sheet when applying to your chosen surface, repeat steps 3 & 4.
